

Alpair 6, the rectangular small full range driver

THE NEW MODULAR DRIVER FROM MARKAUDIO

The Alpair 6 is an ultra-high performance full range driver delivering audiophile performance in a chassis (basket) designed for mini line array. The Alpair 6's low range capability is better than many larger drivers. The clarity and detail from this driver will amaze listeners.

This driver is ideal for line-array and multi-driver designs. The chassis (frame) allows for direct fitting in a line. It's a designer's dream as the number of drivers fitted in a column is down to personal choice. This driver can also be used on its own where the rectangular design is preferred, as its performance is identical to the round chassis version

FEATURES

- Smooth silky response full of detail from a compact size
- Large stable Xmax on an ultra-thin cone. The mixed alloy is sourced from Japan
- Low Fo of 74-Hz, one of the lowest resonance frequencies for its size and class
- 100% custom designed and built with flush fit chassis (frame), modern styling
